

To Whom It May Concern

We have been extremely satisfied in the performance of Lifa's 3G Filter as it has improved indoor air quality and therefore the comfort and satisfaction of our customers.

We highly recommend this solution to fulfill the requirements and recommendations of sufficient ventilation, and especially tobacco smoke control in restaurants.

The cost for the initial investment, and also the operation and maintenance costs, have positively surprised us.

Now we have come to understand how little it really costs to provide our clients with good indoor air.
