

NEW UNIQUE INNOVATION FROM LIFA AIR - BATTERY OPERATED BRUSHING MACHINES:

BATT cleaner 20 and portable BATT cleaner 2 with wireless remote control for brush rotation speed and direction change i.e. can be operated by one man only!

BATT CLEANER 20

Easily controlled 20 m (66 ft) long flexible shaft on reel.
For max 315 mm (12 inch) round ducts and 200x200 mm
(8x8 inch) rectangular ducts. Weight only 30 kg (66 lb).

New updated version from the worlds' most sold brushing machine: Lifa Special Cleaner 20.

Widest range of brushes to choose from for all kinds of ductwork (from flexible insulated ducts to stainless steel pipes) and dirt (from dryer vent lint to combustible or hard attached dust).

Battery lasts for 4 hours of continuous brushing and extra battery pack is included in price, easy and fast to change!

BATT CLEANER 2

Portable light-weight unit in carry-on heavy duty box on wheels. Light-weight, only 13 kg (28 lb). Back-pack accessory available also. Easy and fast connection for the 4 different LIFA driller shafts which are chosen as per your needs:

- Wire cable (direct rectangular ducts)
- Extra flexible 8 mm shaft (small round ducts with many 90-degree bends)
- Flexible 10 mm shaft (both round and rectangular ducts with bends)
- Extra strong 12 mm shaft (when heavy-duty brushes needed)

All 4 driller cable types available in stock 3, 6, 9, 12 m lengths (9, 18, 27, 36 ft) – driller shafts incl. carry-bag in which also brushes fit.

Customised LIFA Power Pack extra battery - first truly global solution that works everywhere, no matter if 110V/60Hz or 230V/50Hz – or no electricity at all available!

Can also be used with HepaClean 1100 vacuum suction (NPU) unit – and any other electrical tools! Lithium-Ion battery is charged back to full power within a couple of hours. Light-weight, only 6 kg (13 lb).
